IT Governance exhibits at Information Security Europe 2013 for a sixth consecutive year

/EINPresswire.com/ IT Governance, the global leader in information security expertise, has announced that it will exhibit at Infosecurity Europe 2013 (www.infosec.co.uk). The event, which is the biggest information security gathering, takes place from 23-25 April in Earls Court in London. The IT Governance team will welcome visitors on Stand F98 (just opposite the technical and business theatres).

Alan Calder, CEO of IT Governance, says, "We are delighted to exhibit at Infosecurity Europe again this year. A lot has happened in the sector during the past 12 months. 'Cyber security' has become an issue of serious national concern, in public, private and third sectors, and the number of companies worldwide achieving ISO27001 certification has substantially increased.

"A lot has changed at our company too. As a single source-provider of information security solutions, we have worked hard to grow our portfolio and give our clients what they need.

"We've added more training courses, grown our range of ITGP books and toolkits, expanded our consultancy services, done some really challenging penetration testing contracts, become a PCI QSA, added ISO9001 certification to our ISO27001-certified ISMS, launched a range of e-Learning staff awareness courses, and our Vigilant Software subsidiary launched a new version of vsRisk™ (www.vigilantsoftware.co.uk).

We now look forward to talking to Infosecurity Europe delegates about this exciting news and explain to them how they can benefit from our expertise."

In 2012 IT Governance welcomed over 200 visitors on its stand, many of whom benefited from product demonstrations as well as free consultancy sessions with our experienced consultants.

This year, IT Governance will again be offering free 15-minute consultancy surgeries on various topics, from ISO27001 certification and PCI DSS-compliance through to penetration testing. Slots are allocated on a first come, first served basis and can be booked in advance online at www.itgovernance.co.uk/infosec2013.aspx.
