Mesh Networks & Tinian Communications Joint Venture to Deliver State-of-the-Art Bandwidth Management

HOUSTON, TEXAS, July 11, 2013 /EINPresswire.com/ -- Tinian Communications has selected Mesh Networks as a strategic technology provider for delivery of patent pending, next-generation, bandwidth management solutions for the Student Housing, Multifamily (MDU) and Hospitality markets.

Mesh Networks (Mesh) and Tinian Communications (Tinian) are pleased to announce today that they have formed a new business relationship which will re-revolutionize the deployment, delivery and utilization of bandwidth management in the Student Housing, MDU and Hospitality industry.

Tinian provides "best in breed" video, data, voice and related IT solutions to the Student Housing, MDU and Hospitality markets. Tinian selected Mesh because of Mesh's excellent reputation for providing cutting edge, state-of-the-art bandwidth management solutions for home, business and enterprise.

Mesh has developed a unique suite of cloud-based and on-premise bandwidth management technologies that provide significant Internet end-user Quality of Service improvements while reducing bandwidth provisioning costs.

Both companies expect their new relationship will accelerate Tinian's ascent to becoming a preferred IT solutions provider to the highly demanding Student vertical, and beyond. Derek Benavidas, Tinian's EVP and Chief Technology Officer, stated, "Together, we are going to change our industry, clients are boarding the Tinian Jet to success! Our new 'powered by Mesh Networks' engine will help us fly high and share the Tinian/Mesh experience!"

"Residents expect and deserve a great Internet experience. The addition of Mesh's breakthrough technology to our turn-key, managed solutions suite, will raise the bar to a new level of performance expectation" said Jonathan Greenwald, Tinian President and CEO.

"We are very pleased with the development of our new relationship with Tinian Communications," said Martin Scheid, CEO of Mesh Networks. "It's a win-win, everyone is happy when bandwidth is effectively managed, and that's what Mesh products do, manage bandwidth" Scheid concludes.

About Mesh Networks:
