

New ITGP toolkits make ISO 27001 ISMS deployment even faster

ELY, UK, July 31, 2013 /EINPresswire.com/ -- For years, [ITGP](#)'s toolkits have helped organisations to implement ISO 27001-based information security management systems (ISMS) in a fraction of the time and cost of building and documenting management systems from scratch.

Over those years, ITGP has collected feedback and suggestions from customers on how to simplify and improve what was already the most comprehensive toolkit on the market. New ITGP information security documentation toolkits now have significantly improved functionality, helping organisation put an ISO 27001-compliant management system in place even more quickly than before.

The updated [ISO27001 documentation toolkits](#) now enable users with MS Office 2010 to find and change information across the entire toolkit quickly, systematically and consistently:

- Change the look and feel of all your documents with one click,
- Single-input customisation for job titles, responsibilities, and company information, deployed immediately through every document;
- Simplified search and navigation;
- Integrated Excel dashboard lets you drill down to specific documents and monitor the progress of documentation for each role;
- Interactive fields and forms (e.g. drop down menus and date pickers) simplify data input for standard fields;
- User manual with easy-to-use guidance notes and screen tips;
- User-friendly document management: add, move or delete documents with ease.

All ITGP toolkits are designed to slot neatly together to give you a single, integrated and consistent management system that can be cost-effectively deployed across your organisation. Years of hands-on experience and expertise inform the content and structure of ITGP toolkits – all made available to IT Governance customers with just one click.

Sign up to the free webinar on 5th August 2013 to see the latest ISO 27001 Information Security Management Systems (ISMS) toolkit in action here www.itgovernance.co.uk/webinars.aspx.
