

# Announcing Canna-Pet: the First Legal, OTC, Medical Cannabis for Pets

*Two veterinarians and an MIT entrepreneur produce cannabidiol supplements from industrial hemp, specifically for pets.*

SEATTLE, WA, USA, October 28, 2013 /EINPresswire.com/ -- [Canna-Pet](#) refines cannabidiol (CBD) from hemp to provide the medical benefits of “medical marijuana,” but without the “high” of THC.

Two veterinarians and an entrepreneur from MIT have leveraged the high CBD content of industrial hemp and determined the proper dosages for pets, releasing supplements specifically for the health and well-being of cats and dogs.

After seventeen years of research and development, and five years of clinical trials, these supplements are now available directly to the public, over-the-counter and without a prescription.

Canna-Pet supplements are all natural, completely safe, and grant health benefits without any “high.” Sprinkling a tiny measured dose into a pet’s food daily will bring observable results in less than a week.

“

Canna-Pet has no adverse side effects and is completely safe. Because it is derived from hemp it is non-psychoactive and legally available over-the-counter, without a prescription.

*Dan Goldfarb, CannaSalus, LLC*

Canna-Pet supplements are legal and non-psychoactive, because they are refined entirely from industrial hemp, which has nearly zero THC. There are zero negative side-effects and no medical conflicts.

Dan Goldfarb, a cannabis entrepreneur and one of the founders of CannaSalus LLC, explains:

“While medical testing continues to confirm the benefits of CBD in humans, we already know it has amazing benefits in small animals, so the time had come to release a supplement specifically for our favorite small animals - our cats and dogs.

Over the past five years in our clinical testing we have observed remarkable benefits for pets with cancer, arthritis, diabetes, digestive issues, chronic pain, nausea, and those receiving palliative care. These benefits are apparent within just a few days.

Over the long-term animals receiving Canna-Pet demonstrated improved vitality and overall health, reduced aggression and anxiety, reduced obesity, and prolonged lifespans.

We also find that Canna-Pet can be used as a supplemental therapy to reduce the side effects and cost of pharmaceuticals being administered to many pets.

Canna-Pet has no adverse side effects and is completely safe. Because it is derived from hemp it is non-psychoactive and legally available over-the-counter, without a prescription.“

Different dosages are provided based on the species and size of your pet, and the production, testing, and packaging of every supplement is overseen by veterinarians in the USA.

About CannaSalus, LLC.

CannaSalus, LLC is a privately held WA corporation. It was recently formed by two veterinarians and a cannabis entrepreneur from MIT, for the purpose of marketing cannabidiol-rich supplements derived from industrial hemp.

For over seventeen years the founders have been privately researching, developing, and testing cannabidiol supplements for both animal and human health applications.

Canna-Pet, Canna-Cat, Canna-Canine, and Canna-Animal are animal-specific supplement lines from CannaSalus, LLC. They are specially formulated for each animal species, have been in clinical testing for five years, and were made available for sale to the public in October of 2013.
