

FabTrol Systems Highlights 2013 Software Releases at FABTECH 2013

FabTrol Systems wraps up banner development year with introduction of FabTrol Pro Version 2.5 and FabTrol Mobile at FABTECH 2013

EUGENE, ORE., USA, November 5, 2013 /EINPresswire.com/ -- [FabTrol Systems](#), a global leader in [steel fabrication management](#) software, will showcase its 2013 software releases at this year's FABTECH, North America's largest annual metals' industry trade show and conference for metal forming, fabricating, welding and finishing professionals. [FABTECH 2013](#), being held November 18-21 in Chicago, Illinois, will bring together over 35,000 attendees and 1,500 exhibitors for three days of educational and networking events.

Steel fabricators and others attending the conference are encouraged to come by Booth S2159 to learn more about FabTrol Systems' steel fabrication management solutions and see first-hand the company's most recent and upcoming 2013 releases, including:

- FabTrol Mobile, which provides remote access to real-time shipping and production information in FabTrol Pro on mobile devices.
- FabTrol Pro Version 2.5, which features the addition of a new Change Order module that includes a dedicated change order estimating tool, along with a host of enhancements to existing modules, including the addition of direct barcode capture and linear splicing capability.

These year-end releases of FabTrol Mobile and FabTrol Pro Version 2.5 come on the heels of three previous 2013 releases of FabTrol Pro that added estimating, batching, production progress tracking, shear plate nesting, project scheduling, international compatibility features and a host of other enhancements to FabTrol Pro, the company's re-engineered steel fabrication management software.

FabTrol Systems' banner software development year--fostered in part by a late-2012 headquarters' move to an open-space, collaborative steel and glass building--is complemented by other banner-year accomplishments, including greater global presence with new international distributors, a significant increase in product sales, and the addition of new staff including several new software engineers.

FabTrol staff will be on hand to demonstrate the company's full line of integrated steel fabrication management software--including this year's FABTECH-featured highlights--and discuss how the company's software can help steel fabricators manage jobs on schedule and within budget. FabTrol will also be hosting an exclusive Customer Appreciation Luncheon in the McCormick Place Bistro during the event.

About FabTrol Systems

FabTrol Systems, a global leader in steel fabrication management solutions since 1984, is a proud

member of the Dowco Group. Founded by steel fabricators, and still built around a core team of former steel fabricators, the company continues its commitment to the industry by continuously researching fabricators' needs, developing new software solutions, actively seeking feedback from its customer companies—over 1,000 globally—and by working with other industry leaders to address existing and future needs.
