The NFC Bootcamp training program helps businesses understand how to use near field communication (NFC) technology to drive brand awareness and enhance the customer experience. With the growing availability of NFC-enabled devices — whether smartphones, tablets, or wearable devices like wristbands — consumers demand a simplified, customized and personalized experience. Taught by NFC experts, this class offers best practices for using NFC to engage today's connected consumers.

Attendees will learn how NFC is being used in real-world scenarios — presented by people actually creating and implementing NFC solutions. The NFC Showcase is a highlight of the NFC Bootcamp, with demos of dozens of NFC products and hands-on training to help businesses build an NFC campaign immediately.

“Near field communication is changing how we engage with the world around us, and businesses need to understand this – fast. Customers expect constant information, instant interaction and immediate results – all while they are on the go – and NFC can help you meet their expectations. There is no better place to come and understand the impact this technology is having on the way companies do business than at an NFC Bootcamp,” said Robert Sabella, chief executive officer and founder of the NFC Bootcamp. “We are pleased to expand our program to more locations and excited to bring in a range of industry experts to demonstrate how NFC is already engaging consumers.”

Additional NFC Bootcamp dates are being scheduled for cities around the world, including locations like Cape Town, New York, Austin, and Sydney. For information or to [register](#) for a class, visit <http://www.nfcbootcamp.com/event-registration>.
