

Afterburn Fuel: Review Exposing Mike Chang's Pre-Workout Supplement Released

AfterburnFuelReview.com reveals their Afterburn Fuel review after many other reviews have cropped up with bogus claims about the pre-workout supplement.

HOUSTON, TX, USA, January 13, 2014 / EINPresswire.com/ -- [Afterburn Fuel](#), a nutritional supplement that claims it can help people gain lean muscle mass, help them burn body fat, and also provide additional energy to increase their endurance and stamina, has caught the attention of AfterburnFuelReview.com's Stan Stevenson, prompting an investigative review.

“Our Afterburn Fuel review shows that this supplement has the ability to work extremely quickly in terms of providing additional endurance and cardiovascular capacity. As a result, you will be able to work out for longer,” reports Stevenson. “What is particularly unique about this formula is that Afterburn Fuel contains no artificial ingredients and nothing that could be on a banned list. In other words, this is a perfectly legal and safe supplement for you to take assuming that you are otherwise healthy.”

N-Methyltyramine, Methylxanthine, Beta Alanine, Citrulline Malate, Arginine Alpha Keto Glutarate (AAKG), and Creatinol Phosphate (COP) are key in Afterburn Fuel's performance. A modified form of arginine called AAKG, a major component of Afterburn Fuel, is designed for better absorption by the body. The main ingredients used in this high quality “energy matrix” blend are N-Methyltyramine and Citrulline Malate. These ingredients are far less common and expensive than caffeine, but Mike Chang chose to include them because they provide users with a cleaner and more focused energy.

“AfterBurn Fuel is designed to give your body the maximum results from high intensity workouts without having to spend any more time in the gym than you normally would. You'll be far better set up for your next workout the following day as it helps your recovery time by giving you less muscle soreness post-workout,” says Stevenson. “You will also see significant results in terms of strength and size, even if you have had difficulty putting on muscle mass in the past. The ingredients found in this supplement have been proven to help with many aspects of fitness and muscle building.”

“Whether you are interested in becoming ripped and very lean, or more sport specific, when you try Afterburn Fuel, you will see that this powerful pre-workout supplement will be able to help you reach your goals much more quickly and more effectively than what you are doing right now. We would highly recommend this workout supplement for any guy who is looking to put on a few extra pounds of muscle. This pre-workout supplement puts you in the strong state of mind to train at an elevated level.”
