Online IS027001 solutions from IT Governance become accessible to Indian companies

IT Governance has launched four new online ISO27001 solutions to help Indian organisations fight cyber crime.

NEW DELHI, INDIA, August 21, 2014 /EINPresswire.com/ -- IT Governance, the global leaders in information security, risk management and compliance, have launched four new online ISO27001 solutions to help Indian organisations fight cyber crime.

Announced last month, Indian cyber crime incidents in increased three-fold in 2013, compared to 2012. While only 27 cyber crime cases were registered in 2012, there were 104 in 2013. This may seem small in a number but it is still felt that many cases are unreported.

The threat of cyber crime will only worsen over the coming years as more organisations move their information assets on to corporate networks, mobile devices and the cloud.

ISO/IEC 27001 is the only international information security management standard that can help organizations protect their information assets, comply with legislation and thrive despite increased cyber risks.

The new online solutions from IT Governance offer Indian organisations a simple and fixed-price approach to implementing ISO27001 that is in line with budget and preferred project approach.

Alan Calder, founder and executive chairman of IT Governance, said, "If understood and implemented correctly, ISO27001 can help to rationalize security expenditure and reduce the impact of cyber crime, while giving a business a competitive edge."

He continues, "There is no other company in the world that can provide this combination of resources (including books, documentation templates, training and consultancy), accessible online and available at a fixed-price."

The all-in, ISO27001 'Do-it-yourself', 'Get a little help', 'Get a lot of help' and 'We'll do it for you' packages can be booked online at www.itgovernance.in/t-iso27001-solutions.aspx
