Description

Wiseguyreports.Com Adds “Microelectronic Medical Implants -Market Demand, Growth, Opportunities and analysis of Top Key Player Forecast to 2021” To Its Research Database

According to Statistics MRC, the Global Microelectronic Medical Implants market is accounted for \$23.5 billion in 2015 and is expected to reach \$43.9 billion by 2022 growing at a CAGR of 9.2% from 2015 to 2022. The factors such as growing incidence rate in epilepsy, increasing incidence of cardiac disorders and parkinson's diseases are some of the factors driving the market growth. However, high power expenditure and ongoing clinical testing procedures are some of the factors hampering the market growth. The medical implant equipments waiting for approval by the government regulatory authority will remain as an opportunity for the microelectronic medical implants market over the forecast period.
