Veterinary Vaccines Market 2016 Global Trends, Market Share, Industry Size, Growth, Opportunities, and Forecast to 2022

PUNE, INDIA, September 16, 2016

/EINPresswire.com/ -- The Global [Veterinary Vaccines](#) Market accounted for \$5.3 billion in 2014 and is expected to grow at a CAGR of 6.2% to reach \$8.6 billion by 2022. The factors driving the veterinary vaccines market include rising zoonotic diseases, growing incidence of animal diseases, increasing investments by government and welfare associations. However, factors such as increasing adoption of vegetarian food in prominent economies and increasing costs of storage and maintenance of vaccines are hindering the market growth. Growing awareness of animal health in emerging economies and technological innovations are likely to create opportunities for veterinary vaccines market in the coming years.
