PUNE, INDIA, September 20, 2016 /EINPresswire.com/ -- [Global Graphene Industry](#)

Analysts forecast the global graphene market to grow at a CAGR of 38.75% during the period 2016-2020. An atomic layer of graphite is known as graphene. It is an allotrope of carbon in a honeycomb lattice. It forms a two-dimensional (2D) structure and is used for various applications, such as field effect transistors, transparent conductive films, and lithium-ion battery additive. It is used by research institutions as well as business organizations. The graphene market is in the infant stage, with various organizations continuously working to develop new application areas and new production methods that can be adopted commercially.
