Analysts forecast the global hair removal cream market to grow at a CAGR of 8.34% during the period 2016-2020. Hair removal cream depilates by chemically dissolving hair that grows on the surface of the skin. They are a temporary solution for removing hairs. On the other hand, electrolysis and laser are permanent hair removal procedures, which are gaining popularity worldwide. However, laser treatment is an expensive solution, thereby restricting its use among high-income group consumers.
