Market Synopsis of Medical Nutrition Industry Market:
Market Scenario:
Medical nutrition is a therapeutic approach to treating medical conditions and their associated symptoms with the use of a specifically tailored diet devised and monitored by a registered dietitian or professional nutritionist. The diet is based upon the patient's medical record, physical examination, functional examination and dietary history. The major factors impacting the growth of this market include increasing incidences of diseases requiring additional nutrients and increased awareness among population about the benefits of medicated foods and beverages. Changing life style such as habitual smoking, alcohol, extended work hours and relying on fast-food has resulted into lack of adequate nutrients that is also one of the reasons contributing to the growth of medical nutrition industry market. The global market for medical nutrition industry is expected to reach US$ XX by the end of the forecasted period and is expected to grow at a CAGR of XX%
