

# SysTools MailXaminer 4.8.2 with analytics capabilities released

---

*SysTools the leader in email forensics solution announces the availability of its new version 4.8.2 to reduce investigation time for investigator.*

SALT LAKE CITY, UTAH, UNITED STATES, September 22, 2016 /EINPresswire.com/ -- The release of MailXaminer 4.8.2 expands the ability to analyze web based e-mail clients. Enhancements have also been made to streamline additional third party tools for review as well as added support to meet US government standards and added shortcuts to simplify e-mail investigations.

MailXaminer the [email forensics](#) tool is specifically designed to cater to the requirements of end-users in law enforcement and government agencies and digital forensic service providers examining electronically stored information (ESI). With these clientele in mind [SysTools](#) aims to provide a rich feature set to reduce the overall investigation time for digital forensic investigators.

Highlighting the 4.8.2 release is the introduction of visual analytics. Metrics are provided through a unique link and timeline analysis of the dataset. Additionally, MailXaminer 4.8.2 has added support for Skype chat, making it easier for investigators to correlate e-mail, documents, Skype chats, calls and SMS messages.

Natasha Lockhart, VP of Business Development is very excited with the new release. She says one of the important things about this release is compliance with Section 508 which is important criteria for US government agencies. This version also supports MS Outlook for Mac and new report formats based on customer feedback, to include PDF and Bates numbering.

Extended thanks to our loyal customer base who continue to add input and value to our testing and development process.

About SysTools:
