Web Active Directory LLC Announces Q3, 2016 Results

Web Active Directory, LLC announces its 7th consecutive quarter-over-quarter growth.

DALLAS, TX, UNITED STATES, October 13, 2016 /EINPresswire.com/ -- Web Active Directory LLC, the world's leading provider of Active Directory Identity Management solutions today announced strong, continued growth in the 3rd quarter of 2016. Web Active Directory's sales increased nearly 195% from the same period last year driven by demand for effective user provisioning and password management solutions in the education and business sectors. The company witnessed more than 70% in net new business while maintaining an 85% renewal rate in the quarter.

"The marketplace presents a significant opportunity for company growth as our solutions create more efficiency and accuracy with provisioning of new employees, students and faculty while allowing IT and the helpdesk to offload the burden of scripting, manual entry, and the need to take password reset calls" asserts Russell Moratelli, Director of Marketing. He continued, "We specifically have momentum in the education sector because of this return on investment."

Kevin Clemons, Director of Technology, Galt Union High School District, stated "implementing the Web Active Directory solution was a tremendous asset to our school system and IT department. The opportunity to automate the provisioning of students and allow both students and faculty the ability to search other peers and even update their own profiles was critical for us in purchasing the product."

Along with Galt Union High School District, the company also attained customers such as Lake Elsinore Union School District, San Francisco Symphony, Cheyenne Regional Medical Center and Concordia International School Shanghai.

Moratelli concluded by saying, "We're excited to see the positive consequences of expanding our platform and focusing on the needs of customers. We're confident that growth will continue in the final quarter of the year."

About Web Active Directory, LLC

Web Active Directory provides an Identity Management platform web-enabling Active Directory technologies. We provide software and services on premise or in the cloud saving money and time for IT technologists and empowering end-users not to be beholden to them.
