

New U.S. Employment Service Enables Growing Companies to Access International STEM Talent

CTS International launches InternationalExperts.com, providing a solution for growing U.S. businesses who want to attract, and hire, in-demand STEM talent.

SEATTLE, WA, USA, October 12, 2016 /EINPresswire.com/ -- CTS International, a global leader in staffing solutions for domestic and international aerospace customers, announced the launch of InternationalExperts.com. The new service offering delivers an international solution for growing U.S. businesses who want to attract, and hire, in-demand STEM talent.

“Top STEM talent is highly sought after in the U.S.,” said Charles Mosher, President of International Experts. “Heavily financed companies in high-tech markets throughout the country are competing with each other for skilled scientists and engineers. Unfortunately, many start-ups and growing companies don’t have the same level of resources to hire similar professionals.”

“We believe it is important for smaller businesses to be able to access highly-skilled talent, so they can remain competitive,” Mosher added. “That’s why we developed InternationalExperts.com. Our employment service unburdens companies from traditional human resource issues. They now have access to world-wide talent, and can provide exciting opportunities for non-US professionals, without the financial risk or excessive attorney fees of the immigration process.”

Businesses maintain the ability to conduct their normal selection process to determine whom to hire. International Experts then finalizes the offer agreement to become the employer of record and starts the required immigration services on the business client’s behalf.

International Experts offers businesses a full scope of immigration capabilities, from temporary visa attainment to an accelerated Green Card program, reducing Human Resource workload.

The shortage of highly-skilled STEM labor is no myth. That’s why we’re proud to enable non-US STEM professionals to be placed into competitive and exciting jobs, bypassing the frustration of the immigration process.

Businesses now have access to world-wide talent, and can provide exciting opportunities for non-US professionals, without the financial risk or excessive attorney fees of the immigration process.

Charles Mosher, President of International Experts

As employer of record, International Experts will complete I-9 verification, provide benefits enrollment, and undertake any required background checks. They start the process for immigration visas, so that the employee can obtain a longer-term or permanent visa.

International Experts also offers an Accelerated Green Card Program designed to bring highly specialized, ITAR-compliant professionals to the US.

About CTS International

CTS International specializes in bringing top talent and

opportunity together from all over the world. The company holds preferred status with Fortune 500 businesses across North America with companies such as Boeing, Gulfstream and Mitsubishi Regional Jets. In the last 30 years, CTS International has brought in over 7,000 engineers to the U.S.

CTS International was founded in Europe in 1984 to supply skilled personnel to major European companies. In 1985, CTS began U.S. operations and, in 1991, their current headquarters was established in the Seattle, Washington area. For more information, visit www.ctsinternational.com

About International Experts

International Experts began in 2014 to provide greater opportunities for non-U.S. technical personnel and graduates.

International Experts leverages CTS International's proprietary skills-matching system, and international expertise to discover qualified candidates from all over the world, and connect them to highly technical job opportunities. A fully integrated payroll and immigration service provides expedited processing of visas and green cards for newly hired international employees—allowing clients to focus on business, not immigration.
