# Leading Viewer for MS Project Keeps in Step with Microsoft's Newest OS Server and Collaboration Tool

The latest release - Seavus Project Viewer 14 is empowered with support for Windows Server 2016 and SharePoint Server 2016

MALMOE, SWEDEN, October 13, 2016 /EINPresswire.com/ -- Always striving to improve by following client demands and signals from the market, the latest edition of the business project viewing solution, Seavus Project Viewer 14, comes with full support for Windows Server 2016 and SharePoint Server 2016. These new features enable project

teams to work in a server environment of their choosing, as well as independence of the preferred Microsoft Project version being able to open project plans from all versions of MS Project.

Seavus Project Viewer 14 users working in Citrix environments can include the software in their planning process for the upcoming upgrade to Windows Server's latest version. Upgrading on its previous release, where support for Windows 10 was included, the team behind Seavus Project Viewer has enabled support for the newest server variant of the Windows operating system as well.

Moreover, users can work seamlessly with Microsoft's most widely used platform for file sharing and collaboration – SharePoint Server 2016, being able to store mpp project plans for quick team delivery. With the new version of SharePoint Server 2016, project managers can organize their project environment for better archiving project milestones and all project files that are uploaded to SharePoint Server 2016 can be successfully opened by Seavus Project Viewer 14.

Seavus Project Viewer 14 also comes with a series of improvements connected to the import of Microsoft Excel XML files as well as several graphical user interface improvements.

"This release addresses the issues of many of our existing clients working in a Citrix environment, who are currently getting ready for upgrading to Windows Server 2016. Our surveys have shown that many of our clients are using SharePoint Server as a document management and collaboration tool, and thus we have included this feature to optimize their project plan sharing process, as soon as they adopt the latest version." - Ljubisha Mladenovski, Product Analyst working on Seavus Project Viewer.
