PUNE, INDIA, October 19, 2016 /EINPresswire.com/ -- [Global Contact Lens Market](#)

Contact lenses are a replacement for corrective glasses due to their better aesthetic and cosmetic appeal. They are thin lenses that are placed directly on the surface of the eye and are worn to correct vision or for other therapeutic purposes. They are also worn for cosmetic reasons, particularly to change eye color.

Contact lenses can be rigid, soft, or hybrid in nature, depending on the composition of the materials used. The advantages of contact lens over corrective glasses make them suitable to wear in any weather conditions, outdoor activities, or sports.
