PUNE, INDIA, October 19, 2016 /EINPresswire.com/ -- A sewing machine is a device that stitches materials together with thread. They range from foot-operated or electric domestic machines to large, industrial machines. Sewing machines are mainly used to make clothing faster and easier than is possible by hand. Embroidery machine is a machine used to embroider. With it, people can produce a large number of products quickly without a lot of people.

Embroidery machine is widely used in textile industry and fashion industry. Most modern embroidery machines are computer embroidery machine, which can automatically create a design from a pre-programmed digital embroidery pattern. The Computer embroidery machine is mainly composed of mechanical parts, electrical parts and transmission parts.
