Surgical instruments are specially designed tools or devices which are used in operations to modify biological tissue or to provide access for viewing it. Surgical instruments are used to provide assistance to a surgeon during an operation or sometimes by a specialized professional such as surgical technologist or a nurse. Graspers, clamps, retractors, distractors, mechanical clutters, injection needles, and suction tips and tubes are the surgical instruments widely used by surgeons and nurses.

Surgical implants are devices used to replace a missing biological structure, support a damaged biological structure or enhance an existing biological structure. Surgical implants and supplies include artificial joints and limbs, stents and orthopedic appliances. Implantation of medical devices is done by specialized surgeons. Other surgical supplies include protective covers used to aid surgeons while performing surgeries on patients. They include disposable surgical drapes, surgical kits and surgical gloves.

Health monitors, glasses, wearable's segments and mobile apps have received huge investments from medical device manufacturers, technology companies and other investors. These devices are marketed to track personal health, and can be critical tools to monitor chronic illnesses and safety of children and the elderly. Medical device companies are collaborating with technology companies to

The Business Research Company

develop and market devices to monitor and track the health of individuals.

According to The Business Research Company's Healthcare Consultant, Sravanthi Addapally, changes in lifestyles and increases in sedentary jobs are transforming the disease profile of the world population from communicable to non-communicable diseases such as cancer, diabetes and cardiovascular disease. In India for example, healthcare expenditure is expected to grow by 13% from 2005 to 2025.

The Business Research Company expects the medical equipment market to grow to \$ 473 billion in 2019. The Americas was the largest geographic market medical equipment market in 2015, accounting for 40+% of the global market.

The figure shows the year-on-year growth of the [global medical equipment market](#) during 2015–2019.
