

# Com4Green Logistics Group Adopts Freightgate's Visionary Carbon Modeling and Analysis Capabilities

*Com4Green Logistics Group has adopted Freightgate's Visionary Carbon Modeling and Analysis Capabilities*

FOUNTAIN VALLEY, CALIFORNIA, US, December 1, 2016 /EINPresswire.com/ -- Freightgate, the Premier Innovation Leader in cloud computing and mobile applications for logistics and global

supply chain management, announced today that Com4Green Logistics Group has adopted Freightgate's Visionary [Carbon Modeling](#) and Analysis Capabilities. Com4green is a global network of logistic companies that share a vision – toxin-free and environmentally friendly, yet fast and reliable transportation of your cargo. No matter if shipping by air, sea, road or rail – Com4Green Logistics Group will help shippers find a way to leave a green footprint and help to create a better world for tomorrow.

“

com4green Logistics Group will be the first to take our visionary carbon modeling and analysis capabilities we have built into our Logistics cloud Suite

*Martin Hubert, President of Freightgate*

Using the Freightgate's Logistics Carbon-Emission Modeling, a company will be able to generate different rate and routing scenarios that compare operational, financial and environmental impact of their supply chain in real-time. The results will help determine which scenario is environmentally sound while at the same time being financially and operationally viable. The carbon footprint tracing feature offers customers transparency on the environmental impact of their logistics movements.

“We are delighted that com4green Logistics Group will be the first to take our visionary carbon modeling and analysis capabilities we have built into our [Logistics cloud](#) Suite from casual use to be part of the daily their business. Freightgate has been delivering Logistics Management Solutions since 1994.” states Martin Hubert, President and CEO of Freightgate, Inc..

Freightgate's Logistics Cloud Suite, known as the Freightgate Universe, enables solutions empowering professionals on all levels to collaborate with global vendors and logistics providers seamlessly on a single common transportation sourcing platform for informed decision-making across the entire network. It encompasses ISO9001:2008-certified end-to-end transportation management processes from procurement, rate management, optimization, execution and visibility, carbon footprint, through invoice audit & pay. The Freightgate Universe is comprised of adaptive easy-to-deploy modules to help companies leapfrog into the 21st century with minimal start-up cost. Freightgate is the only commercial EFM compliant platform enabling standardized web-services as promoted by the US-DOT and Transport-Canada.
