

Insulin Delivery Devices Market Global Segmentation, key Players, Supply, Share, Trend, Analysis and Forecast 2020

global insulin delivery devices market is expected to reach USD 14.2 billion by 2020 at a CAGR of 6.9% during the forecast period

PUNE, INDIA, January 3, 2017 /EINPresswire.com/ -- [Insulin Delivery Devices Market](#):

Diabetes is a chronic disease caused due to insufficient production or inappropriate use of insulin in the body. It is a collection of diseases characterized by elevated blood glucose level. It is mainly of two types namely, Type 1 and Type 2 diabetes. Type 1 is caused due to lack of insulin, whereas Type 2 diabetes is caused due to the futile use of insulin.

Globally, insulin delivery device is witnessing growth primarily due to increase in the prevalence of diabetes. The rise in the geriatric population, growing awareness of diabetes and technological advancement in the delivery device are also driving the growth of the market. In addition, risk factors for Type 2 diabetes and high blood pressure are increasing steadily with the rise in obesity. However, the high cost of insulin and the risks associated with delivery devices are inhibiting the growth of the market.

The global insulin delivery devices market is expected to reach USD 14.2 billion by 2020 at a CAGR of 6.9% during the forecast period.
