

# DuraFast Label Company Now Shipping the Gemini Digital Sheet Label Die Cutter

*Digital die cutter for sheet labels now shipping*

TORONTO, ONTARIO, CANADA, January 11, 2017 /EINPresswire.com/ -- [DuraFast Label Company](#) a division of Sector Nine Distribution Ltd from Toronto, Ontario is preparing is now shipping the new [Gemini digital sheet label die cutter](#) to customers across Canada, USA, and Latin America. The Gemini die cutter was formally launched in Chicago, Illinois, this September at Label Expo. DuraFast Label Company is now shipping this sheet label cutter across Canada to its customers.

Basat Khalifa, DuraFast's CEO, said that the Gemini digital sheet label die cutter will sell for \$8,095.00 CAD. "This is an incredible price for a [digital die cutter](#) of this caliber," he said. "And it works with sheet labels printed on standard color inkjet and laser printers (letter or tabloid size). This opens the doors to businesses that aren't ready for a standalone – and costly – digital label press."

The Gemini die cutter is used to cut pressure sensitive sheet labels or tag sheets after they've been printed. The Gemini senses black marks using an internal camera and iMark software, allowing for precise alignment and cutting.

"This die cutter is a good bargain for a wide range of businesses with diverse printing and cutting needs," Khalifa said. "Use the Gemini with an inkjet or laser color printer you already own or pair it with the UniNet iColor 600 (tabloid) or iColor 500, which prints sheet labels using the standard four colors (CMYK) as well as white and fluorescent toners," Khalifa explained.
