Operational Database Management Market Estimated to Generate Over USD 60 Billion Revenue during 2016 to 2022

Operational Database Management Market by Application (Data Formatting, Data Validation), Component (Hardware), End-User (Government, Healthcare)- Forecast 2022

PUNE, MAHARASHTRA, INDIA, January 11, 2017 /EINPresswire.com/ -- Market Highlights and Drivers

" We enable our customers to unravel the complexity. "

Market Research Future

Market Research Future published a Half Cooked Research Report on Operational Database Market. The global market for Operational Database Management is majorly driven by factors such as growing database by end user industries such as healthcare, government, energy, insurance, and financial services among others.

> Key Players in market are Oracle Corporation (U.S.), Microsoft Corporation (U.S.), SAP SE (Germany), IBM Corporation (U.S.), InterSystems Corporation (U.S.), MongoDB Inc. (U.S.), MarkLogic corp.
> *Market Research Future*

Operational Database Management Market is expected to grow at CAGR of ~5% during the forecast period and expected to reach market size of USD ~60 billion by 2022. Operational database is expected to find sustained growth in the market during the forecast period due to technological advancement which lead to growth of instant solutions and extracting real-time information for more efficient and effective decision making. Operational database offers independence from application programs, better integrity and reduce data repetition.

Important factor driving the growth of Operational Database Market is its ability to allow multiple users to edit data simultaneously. This database can be modified based on different business rules and they provide different customizations like data formatting, and data validation. The factors restricting the growth of operational database market are security threats, reluctance of small and medium-sized enterprises to invest in IT systems and data breaches.
