Global E-Passport and E-Visa Market to Grow at a CAGR Of 30.17 Percent Over The Period 2015-2019

Orbis Research has added report on "Global E-passport and E-visa Market 2015-2019".The report splits by product types, Size,Share,Trends, Growth & Applications

DALLAS, TX, UNITED STATES, February 16, 2017 /EINPresswire.com/ -- E-passports and E-visas are used to authenticate a traveller's identity when crossing borders or entering into another country. This technology stores data about the traveller on a smart chip, which includes a unique identification number and a digital signature. It is more secure than traditional paper technology as it prevents data alteration and duplication. The data stored electronically on the chip is authenticated by PKI, thus making e-passport forgeries impossible. Facial, fingerprint, and iris recognition are major biometric modalities used for this process.
