

# T/CCI Manufacturing Creates Unique Value with New Airbrake Compressor

*Airbrake along with industry leading A/C compressor product lines to be on display at MACS 2017 February 15-18*

ANAHEIM, CA, USA, February 16, 2017 /EINPresswire.com/ -- T/CCI Manufacturing, a world leader in compressor technology including reciprocating, swash plate, wobble plate, and variable compressor designs, will display their latest solutions at the 2017 MACS Training Event and Trade Show, February 15-18 in Anaheim, California. Their durable, high performance compressors provide leading solutions for everything from small all-terrain vehicles to 60 passenger buses.

“Our value proposition in the market is stronger than ever with the products we’ve released over the last year,” T/CCI President Richard Demirjian said. “Our customers need durable, efficient and cost competitive products to keep their global operations running and profitable. Our latest line of compressors helps them do that.”

“

Our value proposition in the market is stronger than ever with the products we’ve released over the last year.”

Demirjian*

T/CCI recently introduced an airbrake compressor to the aftermarket that is designed for superior efficiency, lasts longer and costs 10-25 percent less than remanufactured alternatives.

T/CCI has pulled from 50 years of expertise in compressor technology and design to develop this latest line of durable, high performance compressors that outperforms the competition in nearly every category at a more affordable

price point.

The line includes 10 models with hundreds of applications including Caterpillar and Detroit Diesel engines among others. PACCAR was the first company to take it into the aftermarket service line at the end of 2016.

“We’ve done this before in the a/c compressor business and offered a product that people want and service departments need. We think the air brake is going to trend the same way as our air conditioning compressor business – which has seen 20 percent compounded annual growth for the past several years,” T/CCI Director of Sales Lindsey Parrish said.

T/CCI will also highlight highly popular compressor products including the QP40 and QP08 through 31, ideal for bus, military and refrigeration transportation vehicles; the T/CCI variable Compressor QPV125, ideal for automotive and small construction applications; and the 7H15 is one of the most flexible designs in the A/C compressor industry.

#### About T/CCI Manufacturing

T/CCI is a world leader in compressor technology including reciprocating, swash plate, wobble plate, variable compressor and air brake compressor designs. We are an Original Equipment Manufacturer for trucking, off-highway, agriculture/construction, specialty vehicle and transport refrigeration markets. T/CCI is dedicated to a leadership role in the industry- investing resources through our engineering, testing and R & D labs including next generation refrigerants that reduce emissions. Our global footprint spans manufacturing locations in China, Argentina and the United States with warehousing, sales and engineering in Illinois, Texas, China, Argentina, Ireland, Germany and Spain. We are committed to providing customers with superior products at significantly better prices. We achieve this through our application expertise, global logistics, design thinking and product innovation. T/CCI is recognized and awarded Bronze SQEP certifications by Caterpillar at both Ningbo, China and Decatur, IL manufacturing facilities.
