/EINPresswire.com/ -- [Global Biometric Market](#)

Biometrics involves the authentication and identification of an individual by one or more unique biological traits such as fingerprint, facial, iris, voice, and vein recognition. Biometric technologies are considered to be more reliable when compared to authentication via numeric codes and physical devices. With advances in signal and image processing technologies, pattern recognition, and sensors and readers; a number of biometric technologies, such as a keystroke, ear, electroencephalogram or electrocardiogram (ECG), gait, and palm print recognition have been developed to enable foolproof identification of individuals.
