

# Global Nylon Fiber Market Competitive landscape, Key company profile analysis, Opportunities By 2016- 2022

*Global Nylon Fiber Market Research by type,by Application,by End User,by Region - Forecast till 2023*

PUNE, MAHARASHTRA, INDIA, April 21, 2017 /EINPresswire.com/ -- Market Highlights

Major key Players include E. I. du Pont de Nemours company, Sumitomo Chemical Co., Ltd., Toray Industries, Inc., UBE INDUSTRIES, LTD, Aquafil S.p.A, Fiber Innovation Technology, Inc ”  
*Market Research Future*

Synthetic textile fibers have revolutionized the textile industry. Such artificial fibres are usually long-chain polymers, produced industrially by the condensation of many small units. Nylon fiber has found in various industrial applications such as automotive, textile, industrial and others. In Industrial end use nylon fiber used in various application such as sleeping bags, tarpaulins ,tire cord, hoses, conveyer and seat belts, air bags, parachutes, tents, racket strings, ropes and nets, thread, monofilament fishing line, dental floss. Also it is used in Bedspreads, carpets, rugs, upholstery and in other textiles. Nylon fibers are strong, elastic, abrasion resistant, easy to wash, resistance from oil and other chemicals, can be dye in various colors, moisture resistance, smooth, soft, long-

lasting fabrics, light weight and warmth.

Nylon 66 fibers is used when the need of stability, rigidity and strong mechanical & chemical resistance. It is used in textiles & carpets industry such as such as apparel, airbags, and for carpet fibers.

Whereas Nylon 6 fibers used in various application in a wide scale of products requiring materials of high strength. It is broadly used for bearings, gears, and fittings in automotive industry for underthehood parts, and as a material for power tools housings. Nylon 6 is also used as thread in bristles for brushes, and strings for musical instruments. It is also used in the manufacture of a large variety of nets, ropes, threads, and filaments. Nylon 6 fibers is used as washers in manufacturing industries.

Nylon 6 and nylon 6,6 fiber type will continue to lead the nylon fibers market in forecasted period, additionally textile industry will be the major driver for nylon fiber market. Nylon fiber take a part a significant role in automotive and textile industries and are also used in the household and other industries.

## Key Players

- E. I. du Pont de Nemours and Company(US),
- Sumitomo Chemical Co., Ltd.(Japan),
- Toray Industries, Inc.(Japan),

- UBE INDUSTRIES,LTD.(Japan),
- Aquafil S.p.A(USA),
- Ascend Performance Materials(US),
- Fiber Innovation Technology, Inc.(US),
- Others.

Taste the market data and market information presented through more than 50 market data tables and figures spread in 110 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on “[Global Nylon Fiber Market Research Report- Forecast to 2023](#)”

### Segment Analysis

The global nylon fiber market is majorly segmented on the basis of types, application, end user and region.

Based on types market is segmented into nylon-4,6; nylon-6,6; nylon-6; nylon-6,10; nylon-6,9; nylon-6,12; nylon-11; and Others nylon-12 and others.

Based on application market is segmented into clothes, fishing, packaging, carpet, air filtration, and others,

Based on end user market is segmented into automotive, textile, industrial and others and based on region market is segmented into North America, Europe, APAC, Latin America, Middle East & Africa.

Automotive and textile industries including applications like clothes, fishing, packaging, carpet, air filtration, continued to be the highest end use of nylon fiber in the APAC and Europe. Most nylon fiber consumed by the automotive industry. Global market nylon fiber is driven by demand from North America, APAC, Europe, South America and Middle East.

### Intended Audience

- Nylon fiber manufacturers
- Traders and distributors of nylon fiber
- Production Process industries
- Potential investors
- Raw material suppliers
- Nationalized laboratory

Global Modified Starch Market Information- by source (grain (corn, wheat and rice), vegetables (cassava and potato), and others), by modification process (degradation, acid, oxidation, dextrinization, substitution and others), by application, by nature and by Region - Forecast to 2022.Know more about this report @ <https://www.marketresearchfuture.com/reports/modified-starch-market>

### About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.
