PUNE, INDIA, May 30, 2017 /EINPresswire.com/ -- [Global Microspheres Industry](#)

Latest Report on Microspheres Market Global Analysis & 2022 Forecast Research Study

Global Microspheres market is accounted for \$3.41 billion in 2015 and is expected to reach \$8.38 billion by 2022 growing at a CAGR of 13.7%. Growing demand for energy efficiency, need for advanced drug delivery systems, emerging applications, continuous research and development activities and superior structural properties are the factors enhancing the market growth. However, lack of quality control across developing countries and volatility in the raw material prices are limiting the microspheres market .

Based on type, solid and hollow microspheres comprise comparable growth rate in the global microspheres market. Glass microspheres segment is anticipated to grow at the highest rate over the forecast period. By application segment, medical technology is estimated to expand at faster pace over the forecast period. Asia Pacific is expected to witness fastest growth on account of rapidly expanding health care industry in countries such as India and China. North America dominated the global microspheres market due to huge investments in R&D by the major players. The U.S. and Canada in North America are amid the most advanced countries in the world and are leading in the adoption of latest technological advancements in healthcare industry, thus providing enormous opportunities for the Microspheres market in this region.
