PUNE, INDIA, June 16, 2017 /EINPresswire.com/
--

The analysts forecast the [Smart Machines Market in Europe](#) to grow at a CAGR of 15.18% during the period 2016-2020.

The growing need for process improvements and the need to reduce cost on major process related parameters drive the adoption of smart machines in both the industrial and service industries. Major level of adoption is witnessed in the industrial set-up mainly due to the advantages of smart machines in streamlining the complete production or manufacturing processes. The industrial sector is governed by machines that are operated according to set parameters and continue in the process with the aid of automation solutions. Robotics and smart machines are the next generation of automation technologies that are adopted in factories to enhance productivity and cut process-related operational expenses.

Service industries, which are highly customer centric, are on the verge of developing a one-stop solution environment with the existing workforce. Smart machines, such as expert systems and digital assistants, are deployed to address the growing consumer enquiries and complaints. Successful implementation of smart machines in service industries is expected to garner 25%-30% new customers in the banking and retail sectors.
