[Global Antiemetic Drug Market](#)

Description

Emesis is defined as forceful expulsion of stomach content either due to humoral stimulation due to chemoreceptor trigger zone (CRTZ) or neural stimulation of emetic centers. The various drugs that are used to treat this condition of emesis are known as antiemetics. The various classes of drug available for management of emesis are serotonin antagonist, dopamine antagonist, NK1 receptor antagonist, antihistaminic, steroids, and anticholinergic. The various applications of antiemetic drugs include chemotherapy, surgery, gastroenteritis, morning sickness, motion sickness, stress-induced emesis, and drugs-induced emesis.

This market is primarily volume driven as majority of drugs are available in generic form.
