SURELINE SYSTEMS EXPANDS FUNCTIONALITY FOR INDUSTRY LEADING SUREEDGE MIGRATOR

Enterprise-Class Cloud Migration Software Solution Delivers Improved Ease-of-Use and Faster Time to Production

SAN JOSE, CALIFORNIA, US, June 27, 2017 /EINPresswire.com/ -- Sureline Systems, a leader in enterprise-class public and private cloud migration and disaster recovery software solutions today announced new features for their patented and award winning SUREedge® Migrator which supports physical and virtual server, cloud and container migration. These enhancements further demonstrate Sureline's ongoing commitment to innovative product development to ensure it is delivering the most robust solutions in response to customers' demands for enterprise-class software that allow them to migrate servers to new infrastructures.

> Substantial benefits are added for our customers allowing them to migrate efficiently, reliably & error free without interrupting their production environments; with dramatically decreased downtime"
>
> *George Symons, COO, Sureline Systems, Inc.*

Among the enhancements are:
• Linux VMs can now use the direct copy feature previously added for Windows which allows for dramatically reduced cutover times
• Enabled faster localization of the product through restructuring of messages
• Improved workflow: plans allow target specific configuration features to be defined up front to streamline the recovery process

Tweet this: @SurelineSystems adds dynamic enhancements to SUREedge Migrator industry leading #cloudmigration software solution – full story at http://bit.ly2hjZObP

SUREedge Migrator supports the leading hypervisors including VMware, Hyper-v and Nutanix AHV and is qualified with the leading Cloud environments including Google Cloud, ASW, Azure and OpenStack Liberty. During migration, SUREedge injects the necessary drivers and performs other transformations to ensure bootability of the migrated servers when migrating from one hypervisor/cloud environment to a different one. SUREedge Migrator allows organizations to migrate complete workloads to new infrastructure inside a data center, from data center to data center, to public clouds, between clouds, or from a cloud back to on-premises.

Unique capabilities in the SUREedge® platform include an agentless architecture for ease of installation and minimal impact on production servers, a plan driven UI that allows tens, hundreds or thousands of servers to be migrated in an automated process, and automated transformations so that the migrated VMs are ready to run on the target hypervisor. The software is easy to deploy, highly scalable, hardware and hypervisor agnostic.

SUREedge Migrator captures application consistent images from any physical or virtual server. These point-in-time images are then replicated using efficient deduplication, compression and encryption, to a local or remote site or Cloud. SUREedge Migrator includes a migration planner to develop an end-to-end plan to automate the overall migration process. The plan identifies which machines are to be migrated and when, and defines any interrelationships between servers that create complex applications. SUREedge leverages its automated transformation functionality to migrate from any source to any target, local or remote site or Cloud, where dissimilar hardware or operating environments can be used at the source and target.

"We are very excited to announce these new features," said George Symons, COO, Sureline Systems, Inc. "We believe these add substantially more benefits for our customers allowing them to migrate efficiently, reliably and error free without interrupting their production environments and with dramatically decreased downtime."

About Sureline Systems
Sureline's patented and award winning SUREedge® is a proven enterprise-class software solution for Cloud Migration, Cloud Disaster Recovery, Datacenter Consolidation and Application Mobility. SUREedge reduces risk through encrypted and efficient data transmission, and reliable transformation of the entire application, its data and interdependencies. It is easy-to-deploy and manage through a single UI, with automated discovery, no agents to install, and is completely non-disruptive. SUREedge is source and destination agnostic working to/from any physical server, any hypervisor (including hyperconverged infrastructures), any cloud, with any storage. Customers worldwide trust SUREedge to meet their migration, disaster recovery and application mobility objectives. Sureline is headquartered in San Jose, CA., and its products and services are available through a global network of partners
