Global Door System Market Information, by Material (Wood, Metal, Glass, and Plastic), by Technology (Manual, and Automatic)

PUNE, MAHARASHTRA, INDIA, July 13, 2017 /EINPresswire.com/ -- Door system is an important component of the decisions involved while planning a residential and non-residential project. The recent trend in door system is that of various folding and sliding door systems with different runner types which permit solutions for all furniture segments. Moreover, different sizes and materials have resulted in increased popularity of such systems. With the boom in the construction industry, there is an increasing need for security, convenience, and concerns about the environment. Demand for high quality doors for residential as well non-residential purposes is some of the other factors that drive the [door system market](#). Increase in the disposal income, innovation and the growing demand for construction are fueling the market demand. However, lack of awareness about the various technologies in door system acts as a major barrier for the market.
