

# Capsule endoscopy Market is expected to grow at a CAGR of 9.2% till 2023

*capsule endoscopy market research report, by component (wireless capsule and receiver), by product (rigid endoscopes,), by application - Forecast till 2023*

PUNE, MAHARASHTRA, INDIA, July 17, 2017 /EINPresswire.com/ -- Market Highlights

Major Key Players are Fujifilm Holding Corporation (Japan), Olympus Corporation (Japan), Given Imaging (Israel), RF System Lab (US), Capso Vision Inc. (US), ”  
*Market Research Future*

Capsule endoscopy is the method to examine the digestive system. This technique is used for diagnosis of gastrointestinal tract (GIT) diseases, esophageal diseases and many more. Increasing prevalence of these diseases, technological advance in the method of endoscopy, development in healthcare sector and increasing demand for the better diagnostic treatment has driven the market growth. Beside this supportive government initiatives and rising global geriatric population has provided a synergistic effect on the market growth. On other hand high cost for the diagnosis and

limited reimbursement are the major hurdles for the growth of the market. The [global capsule endoscopy market](#) is expected to grow at a CAGR of 9.2% during forecasted period of 2017 to 2023.

Geographically, Global capsule endoscopy market is dominated by North America. Increasing people suffering from GIT diseases, rising geriatric population and governmental support for the research are the major driving factor for capsule endoscopy market in North America. Europe has second largest market for capsule endoscopy which is followed by Asia Pacific. Due to rapid development of healthcare sector, a huge population base and presence of developing economies like India and China in Asia-Pacific region has led this region to grow at the fastest CAGR of 10.1% during forecasted period of 2017-2023.
