

# VPai Android App Update Brings New Ways to Capture & Share 360° Experiences

*Version 2.0 introduces image filters, time-lapse photography and VPai community sharing portal*

NEW TAIPEI CITY, TAIPEI, TAIWAN, July 26, 2017 /EINPresswire.com/ -- Taipei, Taiwan, July 26, 2017 - VIA Technologies, Inc., today announced the release of a major update for the [VPai](#) Android App, bringing a raft of new functions and features for capturing and sharing 360° experiences.

New functions and features include:

- **Filters:** Twelve new color filters are now available to preview or edit captured media within the app, including a black and white filter, a range of beauty enhancements for close-ups of people, and the Skelton filter which transforms a scene into a sketch-like drawing.
- **Space:** The new VPai sharing platform which allows users to upload photos and videos to the VPai cloud to be enjoyed by others in the VPai community.
- **Time-Lapse:** The new time-lapse feature allows users to explore a whole new dimension of 360° capture by creating time-lapse videos.
- **Screen Capture:** Users can now take screenshots directly in the app to share asteroid and crystal ball views of 360° images across any social platform from Pinterest and Instagram to Google+ and Twitter.
- **Weibo Live Streaming:** Added support for Live streaming on the popular China social media platform, Weibo, in addition to YouTube and Facebook.

“

The new features included in our latest update will help to unleash new creative applications for 360° video and photography.”
