Description

Wiseguyreports.Com Adds “Physical Security -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022” To Its Research Database

According to Statistics MRC, the Global Physical Security market is estimated at \$67.89 billion in 2016 and is expected to reach \$126.56 billion by 2022 growing at a CAGR of 10.9% from 2016 to 2022. Factors such as growing expenditure on the security of critical infrastructures, rising adoption of cloud-based data storages and data analytics employed by the organizations are fueling the market. In addition, increasing threat of cyber security, as well as terrorism, has influenced organizations to advance the safety values, thus promoting industry growth. However, lack of correlation among security solutions and privacy concerns against the installation of surveillance cameras are hindering the market growth.

Amongst Type, rising use of security strategies in organizations of all sizes makes system integration service to lead the market. Based on Components, hardware segment dominates the market owing to rising government spending in developing countries such as India, China, and Brazil to monitor security at airports, railway stations and on streets. North America is anticipated to lead market due to increasing illegal actions, need for security against terrorist activities and unlawful immigration in the region. Furthermore, strict government rules for safety & security and technological improvements in physical security solutions such as video surveillance are also fostering the growth of the market in North America.
