Major players in retinal detachment market:

There are plenty of large and small market players which operate in this market:

- Carl Zeiss Meditec, Inc. (US)
- Centervue SpA (Italy)
- Co:Lab Pensacola (US)
- Eyenuk Inc (US)
- Imagine Eyes (France)
- HealPros, LLC (US)
- NEUROVISION IMAGING, LLC . (US)
- Optos (UK)
- Peek Vision Ltd. (UK)

### Regional Analysis:

Considering the global scenario of the retinal detachment market, there are four main regions, America, Europe, Asia Pacific, and Middle East & Africa.

The Americas mainly include North America and Latin America. North America is holding the largest market share. New product development and launches, rapid adoption of new technology, and advanced healthcare facilities are driving the growth for North America retinal detachment market. European region is second important market, especially West European countries are dominating this region. Eastern European countries are also showing significant growth in this market. Patients from different European countries are travelling to Eastern European countries to get comparatively low cost treatments that boosting medical tourism in this region. Due to increasing spending on healthcare and related services, and government initiative to increase awareness as well as to provide affordable healthcare, Asia Pacific is witnessing rapid growth in this market. Talking about the market scenario of Middle East & Africa retinal detachment, this region is expected to have limited growth. Developed Middle Eastern region is holding largest market share while Africa region is growing steadily.

### Segmentation:

Global retinal detachment market has been segmented on the basis of type which comprise of rhegmatogenous, tractional, exudativem, and others.

On the basis of diagnosis it is segmented into retinal examination, imaging, fluorescein angiography, fundus photos, visual field test, and others. Imaging tests includes ultrasound and others. Ultrasound imaging is further sub-segmented into B-scan, A-Scan, and others.

On the basis of treatments, the market has been segmented into retinal tears, retinal detachment, and others. Retinal tears includes laser surgery (photocoagulation), freezing (cryopexy), and others. Retinal detachment is further sub-segmented into pneumatic retinopexy, scleral, vitrectomy, and others.

On the basis of end user, it is segmented into eye hospital and clinics, medical research centers, academic institutes, and others.
