The Total Market Size of Human PapillomaVirus (HPV) Vaccines including 6MM (the United States and EU5 countries) and RoW was estimated to be USD 1.98 Billion in 2016. The market is expected to reach a total of USD XXXX Millions by 2025 with a CAGR OF XXX% for the period 2015-2025. Market size has increased in recent years for HPV due to the approval of Gardasil 9 (Merck & Co.)

which targets 9 different HPV types (Types 16, 18, 31, 33, 45, 52, and 58). Although the overall HPV Vaccines market is increasing, the sales of Cervarix (GlaxoSmithKline) has been declining over the years owing to the company's decision to stop the vaccines' supply in the United States. GlaxoSmithKline has taken this step due to the low market demand of Cervarix in the US.
