Market

Recent research indicates that the cannabis industry has been growing steadily and rapidly since the passage of laws allowing the distribution of marijuana. According to Oakland-based marijuana angel investment network, The ArcView Group (Executive Summary, 5th Edition), national legal sales for 2016 grew to \$6.7 billion from \$5 billion in 2015, fueled by explosive growth in adult use market sales. The growth continues in a robust pattern that ArcView estimates will lead to a \$22.6 billion market in 2021 at a 27% compound annual growth rate.

In November 2016, a new set of regulations paved the way for a recreational marijuana market in Nevada. The state of Nevada began recreational sales on July 1, 2017 which is expected to register a compound annual growth rate of 42% over the next five years, thus adding up to \$433 million in sales annually by 2021. The evolving legal environment combined with changing public attitudes are all factors contributing to a perfect storm to cultivate industry growth.
