

# Asia Attracting Investors With Opportunities In Ethanol Market

LONDON, GREATER LONDON, UK, October 2, 2017 /EINPresswire.com/ -- Demand for ethanol continues to grow in China, driving the Asia ethanol market. China is expected to present good opportunities in ethanol market in the period from 2016 to 2020 according to [“Ethyl Alcohol and Other Basic Organic Chemicals Market Global Report 2017”](#) by [The Business Research Company \(TBRC\)](#). According to TBRC analysis, the Asia ethanol market was valued at \$203 billion in 2016 and it is expected to reach close to \$300 billion by 2020 with projected forecast growth of 10%.

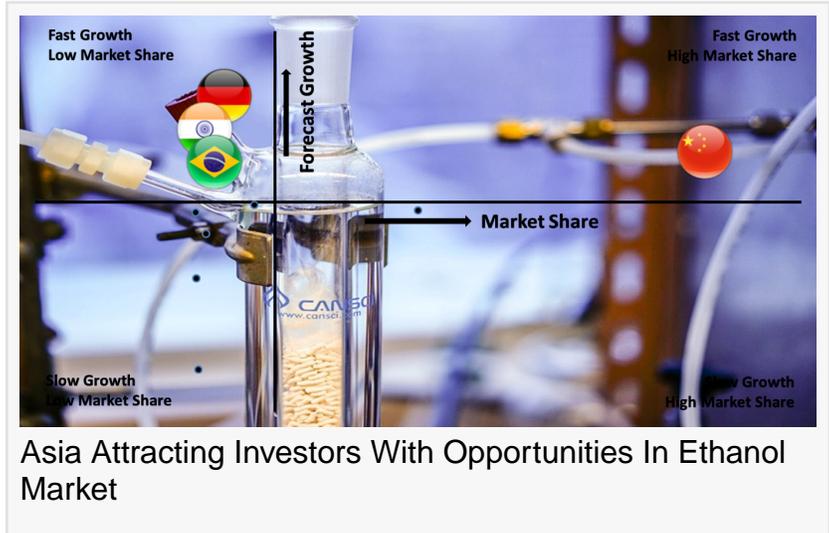

China’s market of ethyl alcohol and other basic organic chemicals was valued at \$137 billion in 2016 and it is expected to grow to \$192 billion by 2020. The market’s forecast growth is estimated to be 9%. The reason for such growth is a switch to use ethanol as fuel. Beijing plans to roll out a gasoline known as E10 - containing 10% ethanol - across the world’s largest car market by 2020 (<http://www.agriculture.com/markets/newswire/refile-china-to-import-more-corn-to-meet-ethanol-fuel-use-analyst>). The reason behind this is an effort to clean up China’s polluted skies and to find a use for the 200 million tons of corn China has in store (<http://www.producer.com/2017/09/chinese-ethanol-plan-could-shake-up-markets/>).

India is expected to attract investors in the ethyl alcohol and other basic organic chemicals market in the period from 2016 to 2020. The market in India was valued at \$3 billion in 2016. TBRC expects the market to grow at 7.30% growth rate. Such strong growth in India is due to continuous increase in ethanol’s demand on account of the growth of user industries and use of ethanol as a fuel in the country.

Ethyl alcohol and other basic organic chemicals are a broad class of substances containing carbon and its derivatives. Many of these chemicals contain hydrogen with or without oxygen, nitrogen, sulfur, phosphorus, and other elements. They exist in either carbon chain or a carbon ring form (<https://www.hon.ch/HONselect/Selection/D02.html>). Acetic acid, methanol, ethyl alcohol, formaldehyde, citric acid, aromatic polymers and other basic organic chemicals are part of this segment and find their applications in drugs, pesticides, plastics, cosmetics and other products. The manufactured product is distributed to end users like chemicals, manufacturing, pharmaceuticals and fuel distribution companies.

Europe and Americas regions also provide good opportunities in the ethanol market with fast growing countries such as Germany and Brazil. Germany ethyl alcohol and other basic organic chemicals market is projected to show a growth of 9.7% growing from \$2 billion in 2016 to \$2.9 billion in 2020. Brazil’s growth is estimated to be the fourth, among all countries covered, at 5.36%. The market is going to reach \$1.8 billion by 2020. The growth in both countries is accounted to high demands for ethanol fuel.

As one of the main trends in the ethyl alcohol and other basic organic chemicals market TBRC

recommends chemicals companies to invest in technologies and processes to derive chemicals from pine. Demand for pine-derived chemicals is growing rapidly in most countries. Tall oil fatty acid (TOFA), tall oil rosin (TOR), gum rosin, sterols, and pitch are the various pine-derived chemicals. Pine-derived chemicals help companies to reduce carbon and avoid use of fossil fuels. They are used in printing inks, adhesives, paints, coatings, paper making additives, chewing gum, and food additive to reduce cholesterol. The pine-derived chemicals market is projected to reach \$4.8 billion by 2020, at a CAGR of around 4.7 % from 2015 to 2020 (<http://www.marketsandmarkets.com/Market-Reports/pine-derived-chemicals-market-36161841.html>).

#### Where to Learn More

Read Industrial Gas Market Global Report 2017 from The Business Research Company for information on the following:

Markets covered: Hydrogen, Helium, Carbon dioxide, Nitrogen, Oxygen, Acetylene, and Argon.

Companies mentioned: The Linde Group, L'Air Liquide S.A, Air Products and Chemicals Inc., Airgas Inc., Air Water Inc., Messer group

Countries: China, India, Japan, UK, Germany, France, Italy, Spain, Russia, USA, Brazil

Regions: Asia, Western Europe, Eastern Europe, North America, South America, Middle East, Africa, Oceania.

Time series: Five years historic and forecast.

Data: Ratios of market size and growth to related markets, population, GDP, Expenditure Per Capita, Industrial Gas Indicators Comparison, Industrial Gas Enterprise and Employee Comparison, Energy Consumption In The Industrial Gas Industry, Industrial Gas Industry International Trade And Production.

Data segmentations: country and regional historic and forecast data, market share of competitors, market segments.

Sourcing and Referencing: Data and analysis throughout the report is sourced using end notes.

#### About The Business Research Company

Visit [TheBusinessResearchCompany.com](http://TheBusinessResearchCompany.com). The Business Research Company is a market research and intelligence company which excels in company, market and consumer research. It has research professionals at its office in the UK, India, and the US as well a network of trained researchers globally. It has specialist consultants in a wide range of industries including manufacturing, healthcare, financial services and technology. The Business Research Company's management have more than 20 years of varied business research experience. They have delivered hundreds of research projects to the senior management of some of the world's largest organizations. The Business Research Company's Consultant have master's qualifications from top institutes and include MBAs, MSCs, CFAs and CAs. The Business Research Company's Consultants gain training and qualifications from the market Research Society and are trained in advanced research practices, techniques, and ethics.
