

BridgeMed Solutions Offers Bovine & Porcine Tissue Patches in Market Led by Edward Lifesciences and Medtronic Inc.

Cross-Linked Bovine and Porcine Pericardium for Transcatheter Heart Valve Industry. Offers Custom Sizes, Thicknesses & Treatments. Low Cost and Quick Delivery.

IRVINE, CA, UNITED STATES, October 10, 2017 /EINPresswire.com/ -- Irvine, CA – Oct. 2, 2017 Tara Kupumbati, President at BridgeMed Solutions Inc., announced the company's in-house manufacturing of custom bovine and porcine pericardium tissue patches to manufacture Transcatheter Aortic Valves (TAVR), Transcatheter Mitral Valves (TMVR), Tricuspid and Pulmonic Valves.

BridgeMed Solutions is a pioneer in the field of glut cross-linking tissue patches for transcatheter aortic, mitral, pulmonic, and tricuspid valves. The firm understands that each client is different and offers multiple sizes and thicknesses of patches to accommodate those requirements.

Extreme care is taken to ensure that patches are of the highest quality and free of particles, scratches or excessive wrinkles. Tissue patches are shipped sterilized & can be shipped in as little as three days. The company can accommodate batches of all sizes and thickness.

“

We provide superior quality GBR1, defect free glut fixed custom manufactured Bovine and Porcine tissue patches per client's request for the heart valve industry,”

*Tara Kupumbati, PhD.,
President and CEO of
BridgeMed Solutions Inc.*

BridgeMed Solutions has extensive experience in [custom porcine & bovine pericardium manufacturing](#) and all of the patches are produced in their own facility in Irvine, CA. The company supplies the tissue patches to startups to global medical device companies.

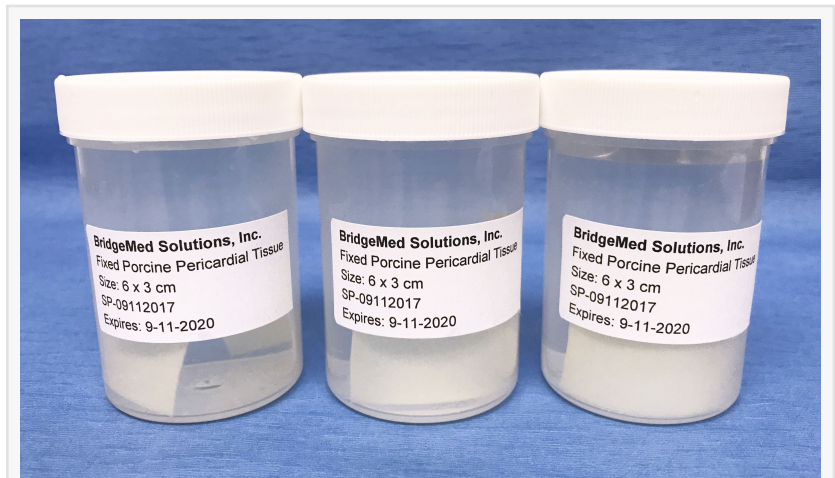

Apart from tissue patches, BridgeMed Solutions also provides end-to-end services [contract manufacturing for TAVR, TMVR, Tricuspid and Pulmonic Valves](#). As part of the [consulting services](#), the company provides disease monitoring, tissue
