Understanding Your Credit Score	
What you should know about credit scores	Your credit score is a number that reflects the information in your credit report. Your credit report is a record of your credit history. It includes information about whether you pay your bills on time and how much you owe to creditors. Your credit score can change, depending on how your credit history changes.
How we use your credit score	Your credit score can affect whether you can get a loan and how much you will have to pay for that loan.
The range of scores	Scores range from a low of 300 to a high of 850. Generally, the higher your score, the more likely you are to be offered better credit terms.
How your score compares to the scores of other consumers	Your credit score ranks higher than 100 percent of U.S. consumers.
