

An invitation to sign an open thank-you letter addressed to the anticancer medicine scientist Aina Muceniece

RIGA, LATVIA, November 7, 2017 /EINPresswire.com/ -- In response to invitation by cancer patients, [Aina Muceniece Virotherapy Foundation](#) has drafted an open thank-you letter to the Latvian scientist for her contribution to medicine and availability of the cancer treatment she developed. The Foundation, patients, their friends and relatives, and some Latvian oncologists have already signed the letter thus expressing support to the contribution of the outstanding Latvian scientist to the development of anticancer medicine.

The letter underlines the importance of virotherapy in lives of many people and expresses gratitude for the availability of the medicine developed by the scientist. It thanks medical professionals, the State of Latvia, its representatives and all people whose work has resulted in the possibility for many patients in Latvia and abroad to access this safe and innovative cancer treatment.

The first to sign the letter were patients from Latvia who participated in the initiative "[Climb for Cancer](#)" organised by the Virotherapy Foundation in the Alps this summer. They challenged the mountains and proved that diagnosis "cancer" is not a death sentence.

"Climb for Cancer" participant Indra Vālande says: "I am a victim of the "traditional cancer treatment". Twice. I think that people must be able to choose between treatment methods. If I had to continue treatment I would choose virotherapy, because I know people whom it has helped. That is why I have joined this letter."

Virotherapy Foundation invite virotherapy patients, their friends and relatives, and other people who admire the work and results of Aina Muceniece to sign the letter on the [Virotherapy Foundation website](#).
