

2e-Systems Wins Top Prize at IATA NDC Hackathon

Judges at the IATA NDC Hackathon in Paris awarded the Corporate prize to 2e Systems

FRANKFURT, GERMANY, November 10, 2017
/EINPresswire.com/ -- IATA hosted the [NDC Hackathon in Paris](#) from 20 - 22 October 2017 where 24 international teams competed in developing products and solutions using the IATA NDC standard APIs to tackle the challenges that face business and leisure travellers.

The 2e team worked hard over the weekend to design, develop and demonstrate a concept that would showcase the NDC standard and help business travellers. Called "ubTrippin" the team built a mobile app to help to organise, manage, book and monitor trips for teams and individuals.

After just 28 hours of continuous coding, the 24 competing teams presented and demonstrated their solutions to a panel of expert judges who, after some deliberations, announced 2e Systems as the winners for the NDC Corporate Prize for "ubTrippin".

"As first time participants at the NDC Hackathon, we were surprised the judges selected our solution, but we're delighted they recognized the potential and value that the app has to help travellers and travel bookers," said Zeljko Sucic, who presented the app on behalf of the 2e team.

Phil Douglas CEO of 2e Systems commented, "You can't imagine how proud we are of our team; not only of their performance but that they were able to demonstrate how NDC can drive innovation for the benefit of travellers and businesses. It was a great idea that was extremely well executed by the team."

As part of the NDC Corporate Prize, 2e Systems has been offered the opportunity to present our solution at the next IATA event and the application itself will be showcased on the [IATA NDC Developers portal](#).

About 2e Systems GmbH

2e Systems provides online, mobile and API solutions for the worldwide aviation industry. The [eePaxSuite](#) product offers a full Ecommerce solution for airlines built on top of a rich offer and order management system, including merchandising. Utilizing the latest NDC standards, eePaxSuite empowers airlines to be in control of their future distribution on both the direct and indirect channels. Airlines that require fast agile and professional development rely on 2e Systems to deliver innovative solutions.
