About Motorcycle Airbag Jacket

The airbag technology has been existing since world war II. It has evolved as an efficient trend to save human lives. The airbag acts as a soft pillow that provides a cushion against the crash shocks (highly accelerated sudden movements). Airbags are gas-inflated cushions. The design of the airbag material and air pressure in the airbag are very critical for operation. When an occupant is subjected to crash loads, it is necessary that the process of bag inflation happens within milliseconds.

Technavio's analysts forecast the global motorcycle airbag jacket market to grow at a CAGR of 30.48% during the period 2017-2021.
