

Emerging Trends in 3D Bioprinting and Other Biofabrication Methods

SMi Reports: 3D Cell Culture 2018 to feature interactive workshop hosted by Heriot Watt University and Queen Mary University of London

LONDON, ENGLAND, UNITED KINGDOM, November 14, 2017 /EINPresswire.com/ -- SMi Group will return to Central London with the next annual installment of [3D Cell Culture 2018](#) on 21st - 22nd February. Not only will the event feature a two-day agenda that will combine pioneering breakthroughs with scientific research, but it will also offer hands on training through a carefully selected pre-conference interactive [workshop](#) taking place on 20th February.

Offering insight into current and future trends within the 3D bioprinting field, in terms of techniques, research, diagnostics, tissue engineering and regenerative medicine, the workshop entitled "3D Bioprinting and Other Biofabrication Methods" will be hosted by Dr Nick Leslie, Professor, Institute of Biological Chemistry, Biophysics and Bioengineering from Heriot Watt University; and Dr Daniela Loessner, Reader, Barts Cancer Institute, CRUK Centre of Excellence, Queen Mary University of London.

3D Cell Culture 2018

“

The beauty of events such as this conference is to bring together researchers who have a common interest, as in this case, 3D cell culture.”

ReproCELL Europe

This workshop will describe and discuss 3D bioprinting and other biofabrication approaches with a particular focus on the materials used in 3D bioprinting and how to apply the technique for diverse cell-based applications; multi-cellular, multi-material and multi-modal technologies.

Further information including a full speaker line-up and detailed agenda is available online at www.3D-cellculture.com

3D Cell Culture 2018 is sponsored by Jellagen Pty Ltd and

Nexcelom Bioscience. It will take place on 21st and 22nd February at the Holiday Inn Kensington Forum in Central London, UK.
