

CVR Medical Meets Critical Milestone. Deploys Wireless System at Thomas Jefferson University

VANCOUVER, BRITISH COLUMBIA, CANADA, November 21, 2017 /EINPresswire.com/ -- CVR Medical Corp. (TSX.V: CVM) (FRANKFURT: B3BN) (OTCQB: CRRVF) ("CVR Medical") announces the full integration of the "Carotid Stenotic Scan (CSS)" wireless device into its late stage, ongoing clinical trials being conducted at Thomas Jefferson University. The wireless system is the key component of the novel device's efficient and user-friendly design. The wireless Intellectual Property in CVR's portfolio fortifies barrier to entry.

"We have now finalized the key milestone, by deploying the wireless version of the CSS at Thomas Jefferson University. The wireless version of the CSS has been 3 years in design, development, validation and now deployment" says CVR COO Tony Robinson. "This is one of the many state-of-the-art advantages we've built into the device, and we believe it goes a long way in reducing cost, easing operation and streamlining entry into the marketplace." The clinician can easily incorporate this revolutionary technology into their office without the need of a certified technician.

To expedite FDA approval, CVR will add additional clinical sites for pivotal trials with the wireless device in anticipation of market launch in 2018.

This press release contains forward-looking information that involves various risks and uncertainties regarding future events related to the Joint Venture. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements and are not guarantees of future performance of the Company. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits the Company will obtain from them. These forward-looking statements reflect management's current views and are based on certain expectations, estimates and assumptions which may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions in North America and internationally, (2) the inherent uncertainties and speculative nature associated with commercialization of technology and the practice of medicine, (3) a change in health regulations, (4) any number of events or causes which may delay or cease commercialization and development of the Joint Venture, (5) the risk that the Company or the Joint Venture does not execute its business plan, (6) inability to retain key employees, (7) inability to finance operations and growth, and (8) other factors beyond the Company's control. These forward-looking statements are made as of the date of this news release and, except as required by law, the Company assumes no obligation to update these forward-looking statements, or to update the reasons why actual results differed from those projected in the forward-looking statements.

THE TSX VENTURE EXCHANGE INC. HAS NEITHER APPROVED NOR DISAPPROVED THE CONTENTS OF THIS PRESS RELEASE. NEITHER THE TSX VENTURE EXCHANGE NOR ITS REGULATION SERVICES PROVIDER (AS THAT TERM IS DEFINED IN THE POLICIES OF THE TSX VENTURE EXCHANGE) ACCEPTS RESPONSIBILITY FOR THE ADEQUACY OR ACCURACY OF THIS RELEASE.
