E-prescribing or electronic prescribing is a process involving the electronic generation and sending of prescription orders for the convenience of medical practitioners or physicians, allowing them to transmit prescriptions directly from the point of care to a pharmacy. E-prescribing enhances the safety of patients and the quality of care, since there is no manual writing involved and thus there is less probability of prescription errors. In addition, e-prescribing also helps conduct security checks, encapsulate medical lists, and compile the complete historical data of a patient.
