Clear Sky Software's Beverage Inventory System Saving Time at the W Hotel in Bellevue Washington

Called Clear Sky BEVERAGE, this is a comprehensive, perpetual inventory system that tracks and controls all beverage products.

CHARLOTTE, NORTH CAROLINA, USA, December 4, 2017 /EINPresswire.com/ -- Clear Sky Software, Inc. ® announced today that The W Hotel in Bellevue, Washington has implemented the company's beverage inventory control system to help manage and control all beverage products. This busy hotel is taking advantage of the features of this industry-leading beverage inventory system. Called Clear Sky BEVERAGE, this is a comprehensive, perpetual inventory system that tracks and controls all beverage products. Functions include purchasing/ordering, receiving, electronic requisition, outlet transfers/issues/returns and physical inventory. All of these software tools allow management at this property to report beverage costs by location, product, and product category. Other features allow staff to report product fast-movers, slow- movers, cost variances, and order/vendor discrepancies. An expanded event management module is also part of the core system installed. This bar code-based software, hardware, and services combination is helping The W manage their beverage inventory with greater efficiency while maintaining low beverage costs.

> "We are delighted and honored to be chosen by The W Bellevue Hotel to assist the staff in managing their beverage operations at this busy hotel."

About Clear Sky Software
Clear Sky Software is a software developer, systems integrator, and technology solution provider to the hospitality industry. The company provides bar code-based food and beverage inventory management systems that help hospitality organizations control inventory, reduce labor, lower costs and increase profits. Clear Sky systems replace manual inventory practices and eliminate repetitive steps therefore offering improvements in worker productivity and accuracy. Two systems – Clear Sky FOOD and Clear Sky BEVERAGE – can be purchased together or separately. These twin systems help reduce the tremendous paper work and labor associated with managing food and beverage inventory. In addition, the company offers inventory solutions for Housekeeping, Retail Areas, and Tableware Inventory. Visit the company at www.clearskysoftware.com.
