LALPINA HYDROGEN CBD is the pioneer and front runner in the CBD hydrogen infused market, as opposed to alternative solutions, where

upwards of 90% of the CBD nutrients are lost in the digestive process. LALPINA HYDROGEN CBD utilizes hydrogen as the delivery mechanism which allows the CBD nutrients to immediately penetrate into the cells, bypassing the bloodstream, and yielding a greater absorption rate. This creates an immediate effect, which appeals to many different demographics with different required uses."

“

There is no other CBD hydrogen infused product on the market, and we're happy to be the first to launch, with 100% market share."

Cannabidiol, or CBD, is one of the fastest growing subsectors of the cannabis industry. Unlike THC, CBDs do not get you "high" yet it provides a wide range of health benefits. CBDs are legal in all 50 states and are not subject to the same strict regulations as THC. CBD-based products provide consumers a chance to benefit from the medicinal properties of cannabis without the impairment.

American Premium Water Corporation (OTC: HIPH), with its related products, also recently announced a 1,134% increase in sales over its previous quarter 2017 and 80% reduction in debt.

This outstanding performance is attributable to the Gents acquisition, in Q3, while also working hard to significantly reduce long-term convertible debt and increase shareholder value.

American Premium Water Corporation (OTC: HIPH) is looking to raise non-toxic capital in the coming quarter to help further fund growth initiatives. With regard to financing, the company is confident that the clean-up they did on the balance sheet will help them achieve this by Q1 2018.
